

AEP, AFH series

DST series

Features

Our safes come with a two-way safety lock as a standard feature.

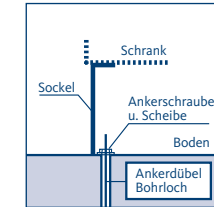

Alternatively all models of the DST and AEP series are available with a mechanic or electronic code lock.

The cabinets of the DST and AEP series are mass-produced in RAL 7015 slate grey and RAL 7035 light grey with a choice of silver-coloured or black fittings. The standard colour for the AFH model is RAL 7035 light grey. Upon request all RAL colours are available at extra charge.

Special features of the AEP series

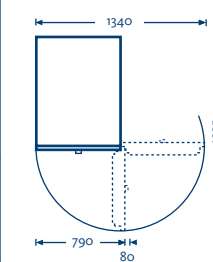

Easy-running doors through quality ball bearings. (AEP series).

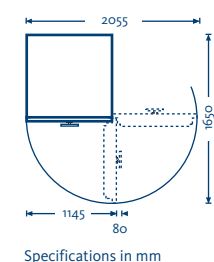

Cabinets of the AEP series that weigh less than 1000 kg are prepared for anchoring.

Required footprint

AEP 510 - 520

AEP 530/540

Features of performance – overview

- Protection against fire in accordance with EN 1047-1**
Protection against fire through sandwich construction with highquality insulants
- Tested burglar proofness in accordance with EN 1143-1**
Tested burglar proofness in accordance with EN 1143-1
- Protection against explosives**
Optimum protection against explosions
- Magnetism**
Protection against hazards caused by magnetism
- Vandalism**
Optimum protection against vandalism
- Shatter proof**
Shatter test from 9.15 m height in accordance with EN 1047-1
- Tilt resistance**
With doors open and drawers extracted
- Gas**
Protection against penetration of smoke and aggressive conflagration gases
- Sealing system for water**
Contents are e.g. protected against water for fire fighting
- Twistlock**
Wraparound locking through 25mm twistlock
- Preparation for alarm systems**
Preparation for connection to alarm systems optional
- TÜV**
Monitored by the TÜV (Technical Inspection Agency)
- Accident protection**
Warranty for tested accident protection
- Recycling**
Raw materials are taken back and reused
- DIN 4102**
The multi-wall construction design of door- and casing walls, the use of fire-resistant insulants in accordance with DIN 4102 as well as the all-around fire lock seam provide the cabinets not only with burglar-protection but also with fire-protection against light fires.

An overview of our product range and our services:

The all-purpose cabinets

Certified Security

Fire-proofness tested in accordance with European standards

Data protection cabinets in accordance with European standards EN 1047-1 tested for fire-proofness:

- S 60 DIS: Fire-proofness for data carriers 60 min tested at 950° C
- S 120 DIS: Fire-proofness for data carriers 120 min tested at 1090° C

Maximum permitted temperature rise 150° C inside the cabinet.

Burglar-proofness tested in accordance with WG (resistance value) class I - III

Data protection cabinets in accordance with European standards EN 1143-1 tested for burglar-proofness:

- WG class I: Burglar-proofness 30/50 RU³
- WG class II: Burglar-proofness 50/80 RU³
- WG class III: Burglar-proofness 80/120 RU³

Burglar-proofness tested in accordance with VdS resistance value classes I - III

Valuables protection cabinets tested in accordance with the regulations of the VdS Schadenverhütung GmbH (Loss Prevention Ltd.) based in Cologne.

Homologised fire-proofness

Warranty for homologised fire-proofness DI 120 P/DIS for your data carriers in the document cabinet (Disc tray AD 10 / AD 20).

Tested in accordance with European standard EN 1047-1 / EN 1143-1

The European Certification Board – Security Systems (ECB-S) is a neutral certification institution in accordance with EN 45001 of the Research and Test Association. Based on a test in accordance with a European standard the European Certification Board issues an ECB-S product certificate. The ECB-S consists of representatives of users, insurance companies and manufacturers provided with equal rights.

Safety – tested and classified

Burglar-proofness WG and EN 1143-1	Fire-proofness EN 1047-1 Model	Insurance classification ⁴ ED tariff (not binding)
Class I (30/50 RU) ³	AEP 510 - 540 S 120 P	commercial: up to € 20.000 private: up to € 65.000
Class II (50/80 RU) ³	AEP 510 - 540 S 120 P	commercial: up to € 50.000 private: up to € 100.000
Class III (80/120 RU) ³	AEP 510 - 540 S 120 P	commercial: up to € 100.000 private: up to € 200.000

³ If connected to an alarm system approved by the VdS (Association of property insurers) the above-mentioned insured value will double.

³ The value of resistance is expressed in RU (Resistant Unit). During the test this RU value is calculated by the testing institution, based on the fracture times measured.
